Moon Wikipedia

February 14th, 2019 - The Moon is an astronomical body that orbits planet Earth and is Earth's only permanent natural satellite. It is the fifth largest natural satellite in the Solar System and the largest among planetary satellites relative to the size of the planet that it orbits its primary. The Moon is after Jupiter's satellite Io the second densest satellite in the Solar System among those whose densities

List of suggested heroes ordered by History's HEROES

February 14th, 2019 - Charles Robert Darwin FRS 12 February 1809 - 19 April 1882 was an English naturalist. He established that all species of life have descended over time from common ancestors and proposed the scientific theory that this branching pattern of evolution resulted from a process that he called natural selection in which the struggle for existence has a similar effect to the artificial selection.
